

Infopanel

content and function organization of touch screen to be used as an electronic bulletin board

Introductory words

Application providing a user template of electronic bulletin board for easy information filling and control settings.

Functionality

Easy settings of showing content of information fields and functions of each control button.

Pre-defined fields:

- Button – 12 configurable buttons for controlling content showing on interactive screen
- Interactive screen – displaying a static image, video or web page according to selected button
- Permanent screen – displaying information regardless of selected button (notice, web page, advertisement, ...)
- Status bar – one line fields in top and bottom part for displaying useful information, time, date...
- Language buttons (language selection) – a space for placing buttons with a language choice
