

Sensuite Gate

Application for automatic sending of emails and text messages.

Introductory words

Functional interface letting you send text messages and emails for specific recipients, groups of recipients on the basis of an impulse from the applications eVstupy and MRS exports.

eVstupy is an application designed for the registration, evidence and administration of extern's cards, visitors, vehicles and notebooks.

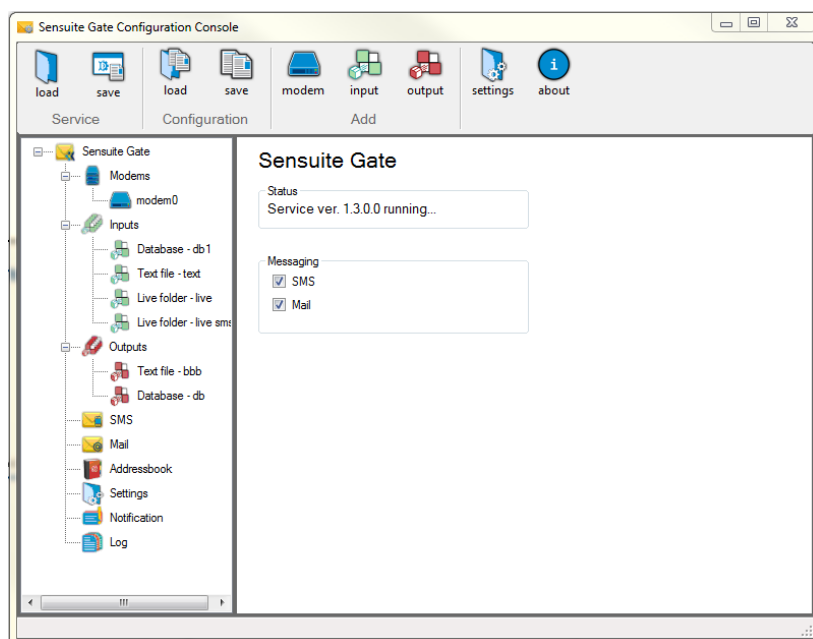

MRS Exports is an application for the evidence of import and export forms of a company.

Functionality

Functional interface letting you send text messages and emails for specific recipients, groups of recipients on the basis of an impulse from the applications eVstupy and MRS exports.

It consists of two parts:

- Sensuite Gate Service for OS Windows – a part of application which is necessary to install. It runs in background and does not disturb the user.
- A console application Sensuite Gate – configurational application, which allows you to set the communication abilities, methods and traces of the app
